## International Improvement Drives UPS 4th Quarter

Company Generates 2009 Free Cash Flow of \$4.1 Billion;

2010 EPS Expected to Increase 17% to 32%

ATLANTA--(BUSINESS WIRE)-- UPS (NYSE: UPS) today announced diluted earnings per share of \$0.75 for the fourth quarter of 2009, above the company's original guidance of \$0.58 to 0.65 per share, due in large measure to strong performance by its international segment. That segment saw volume growth, a substantial gain in operating profit and improvement to a 16.7% operating margin.

The quarter's diluted earnings per share declined 9.6% compared to the \$0.83 in adjusted diluted earnings per share a year ago. Reported earnings per share for 2008 were \$0.25.

For 2009, UPS generated free cash flow of \$4.1 billion and posted adjusted operating profit of \$4.0 billion. On a reported basis, operating profit was \$3.8 billion. Adjusted earnings per share were \$2.31 and \$2.14 on a reported basis.

"UPS ended 2009 on a high note by leveraging network changes implemented throughout the year and executing flawlessly during the peak holiday shipping period, which was stronger than we had anticipated," said UPS Chairman and CEO Scott Davis. "The company demonstrated its ability to manage effectively in changing market conditions. UPS has emerged from the worst recession in decades leaner, more focused and better positioned to take advantage of increased global trade."

			4Q 2008
Consolidated Results	4Q 2009	4Q 2008	Adjusted
Revenue	\$12.38 B	\$12.70 B	
Operating profit	\$1.26 B	\$803 M	\$1.38 B
Operating margin	10.2%	6.3%	10.9%

Average volume per day	17.3 M	17.3 M	
Diluted earnings per share	\$0.75	\$0.25	\$0.83

For the three months ended Dec. 31, 2009, package volume rose 1.4% to 1.1 billion pieces while average volume per day was unchanged at 17.3 million packages.

During the holiday shipping season, global volume exceeded 22 million packages on eight days, including two on which it exceeded 24 million packages. UPS experienced more delivery volume than in 2008 on each of the seven days before Christmas. A well-executed peak season operating plan and significant growth in online retail sales contributed to the stronger-than-expected results for the quarter.

For the full year, the company delivered 3.8 billion packages, an average of 15.1 million per day, down from 15.5 million in 2008. Revenue decreased 12% to \$45.3 billion.

#### Cash Position

UPS ended 2009 in a strong financial position. In addition to exceptional free cash flow, UPS also:

- Paid \$1.8 billion in dividends.
- Invested \$1.6 billion in capital expenditures.
- Repurchased a total of 10.9 million shares for \$569 million.
- Ended the year with \$2.1 billion in cash and short-term investments.

U.S. Domestic Package	4Q 2009	4Q 2008
Revenue	\$7.55 B	\$7.99 B
Operating profit	\$764 M	\$932 M
Operating margin	10.1%	11.7%
Average volume per day	14.9 M	15.1 M

For the fourth quarter, air volume increased with Next Day Air(R) up 2.8% and deferred up 4.3%. However, ground volume per day was down 2.9%. Total U.S. average daily volume decreased 1.9%. Operating margin improved sequentially to 10.1%, the highest in 2009. The 5.2% decline in revenue per piece was driven primarily by lower fuel surcharges and weight declines.

In the quarter, UPS took the lead in the mobile shipping arena with the introduction of applications for iPhone, iPod and BlackBerry devices. In addition, the company expanded its WorldShip(R) platform with integration of a freight forwarding capability that complements its

small package and LTL freight shipping processes.

On Jan. 8, 2010, UPS announced it was restructuring the U.S. Domestic Package segment. By leveraging technology and the management skills of its people, the company will create larger geographic operating entities and provide more marketing resources at the local level. The new structure will be in place by early April.

			4Q 2008
International Package	4Q 2009	4Q 2008	Adjusted
Revenue	\$2.79 B	\$2.64 B	
Operating profit	\$467 M	\$366 M	\$393 M
Operating margin	16.7%	13.9%	14.9%
Average volume per day	2.4 M	2.2 M	

International operating profit jumped 18.8% on an adjusted basis and 27.6% on a reported basis on revenue growth of 5.8%.

Average daily volume growth of 11.8% was driven by increases of 3.1% in export and 17.8% in domestic. These gains and strong cost management contributed to an operating margin of 16.7%, the highest since the fourth quarter of 2007. All regions experienced export volume growth, led by Asia and the United States. Domestic volume improvement was driven by a third-quarter acquisition in Turkey along with strong performance in Europe and Canada.

During the quarter, UPS continued investing for the future with the opening of its expanded hub in Toronto, Ontario, which more than doubled its package handling capability.

			4Q 2008
Supply Chain and Freight	4Q 2009	4Q 2008	Adjusted
Revenue	\$2.03 B	\$2.07 B	
Operating profit	\$28 M	(\$495 M)	\$53 M
Operating margin	1.4%	(23.9%)	2.6%

Reductions in segment revenue and operating profit were caused by declines in global forwarding and UPS Freight.

Forwarding's operating margin was challenged by rapidly escalating transportation costs stemming from a surge in demand in a capacity-constrained environment out of Asia.

The Logistics business recorded an increase in revenue, driven by growth in the healthcare

sector. Improved operating efficiencies and contract management produced strong results.

UPS Freight experienced a difficult fourth quarter. Revenue per hundredweight increased, but shipments were flat and tonnage declined. The unit posted an operating loss for the quarter due to the extremely competitive pricing environment in the LTL business. Year-over-year, UPS Freight gained market share.

## Outlook

"Economic forecasts indicate gradual improvement as 2010 unfolds," said Kurt Kuehn, UPS's chief financial officer. "The first quarter will be the most challenging of the year for UPS with profitability only slightly better than last year.

"For 2010, UPS will substantially improve performance by leveraging our extensive product portfolio and global network," Kuehn continued. "As a result, we anticipate that diluted earnings per share should be within a range of \$2.70 to \$3.05, an increase of 17% to 32% over 2009 results. We also expect cash generation to remain strong in 2010, with capital expenditures totaling \$1.8 billion. This is well below our historical range but still supports growth opportunities."

UPS (NYSE: UPS) is the world's largest package delivery company and a global leader in supply chain and freight services. With more than a century of experience in transportation and logistics, UPS is a leading global trade expert equipped with a broad portfolio of solutions. Headquartered in Atlanta, Ga., UPS serves more than 200 countries and territories worldwide. The company can be found on the Web at [UPS.com](http://UPS.com) and its corporate blog can be found at [www.blog.ups.com](http://www.blog.ups.com). EDITOR'S NOTE: UPS Chairman and CEO Scott Davis and CFO Kurt Kuehn will discuss fourth quarter and full year results with investors and analysts during a conference call at 8:30 a.m. EST. That call is open to listeners through a live Webcast. To access the call, go to [www.investors.ups.com](http://www.investors.ups.com) and click on "Earnings Webcast."

We supplement the reporting of our financial information determined under generally accepted accounting principles ("GAAP") with certain non-GAAP financial measures, including, as applicable, "as adjusted" operating profit, operating margin, pre-tax income, net income and earnings per share. The equivalent measures determined in accordance with GAAP are also referred to as "reported" or "unadjusted". We believe that these adjusted measures provide meaningful information to assist investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. Furthermore, we use these adjusted financial measures to determine awards for our management personnel under our incentive compensation plans. We also provide the amount of our free cash flow to supplement our cash flow determined under GAAP. We define free cash flow as net cash from operating activities adjusted for capital expenditures, proceeds from disposals of property, plant and equipment, net change in finance receivables and other investing activities. We believe free cash flow is an important measure in assessing the generation of cash for discretionary investments and dividends.

In the fourth quarter of 2008, we recorded a \$548 million goodwill impairment charge for our UPS Freight business unit, and a \$27 million impairment charge for a customer list intangible asset in our domestic package business in the United Kingdom. In the first quarter of 2009, we recorded a \$181 million pre-tax impairment charge (\$116 million after tax) related to our McDonnell-Douglas DC-8-71 and DC-8-73 aircraft fleets. In the second quarter of 2009, we recorded a \$77 million pre-tax charge (\$48 million after tax) for the remeasurement of certain obligations denominated in foreign currencies, in which hedge accounting was not able to be applied. We presented fourth quarter and year-to-date 2009 and 2008 operating profit, operating margin, pre-tax income, net income and earnings per share excluding the impact of these items as we believe these adjusted measures better enable shareowners to focus on period-over-period operating performance. The underlying matters that produced the impairment and remeasurement charges were unique, and we do not believe they are reflective of the types of charges that will affect future results.

Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. These adjusted financial measures should not be considered in isolation or as a substitute for GAAP operating profit, operating margin, net income and earnings per share, the most directly comparable GAAP financial measures. These non-GAAP financial measures reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results and the preceding reconciliations to corresponding GAAP financial measures, provide a more complete understanding of our business. We strongly encourage investors to review our financial statements and publicly-filed reports in their entirety and not to rely on any single financial measure.
