UPS Releases 3rd Quarter Results

Earnings at High End of Guidance Range; Volumes Improve Through Quarter

ATLANTA--(BUSINESS WIRE)-- UPS (NYSE:UPS) today reported diluted earnings per share of \$0.55 for the third quarter on \$11.2 billion in revenue. A stabilizing economic environment led to improving volume trends during the quarter, while UPS's International business continued to increase market share.

The \$0.55 in diluted earnings per share was at the high end of the company's guidance range of \$0.45 to \$0.55.

"I'm encouraged by the signs of economic recovery that are becoming apparent, although we still have a long way to go," said Scott Davis, chairman and CEO. "Ongoing strategic investment has positioned UPS to capitalize on growth opportunities around the world. We are managing operations well, while controlling costs and maintaining excellent service."

Consolidated Results	3Q 2009	3Q 2008
Revenue	\$11.15 B	\$13.11 B
Operating profit	\$929 M	\$1.63 B
Operating margin	8.3 %	12.4 %
Average volume per day	14.26 M	14.85 M
Diluted earnings per share	\$0.55	\$0.96

Consolidated volume for the three months ended Sept. 30, 2009, totaled 927 million packages, down 2.4% from the same period in 2008. Average daily volume and revenue per piece declined 3.9% and 11.3%, respectively. Operating profit decreased to \$929 million as the benefits of substantial cost reductions and productivity gains were more than offset by the economic impact of lower volumes and changes in product mix.

Cash Position

Through effective management of capital expenditures and working capital, UPS generated an impressive \$3.4 billion in free cash flow for the first nine months of 2009. The company also:

- Paid \$1.3 billion in dividends.
- Invested \$1.2 billion in capital expenditures.
- Repurchased 7.8 million shares at a cost of \$396 million.
- Ended the quarter with \$2.8 billion in cash and short-term investments.

U. S. Domestic Package	3Q 2009		3Q 2008	
Revenue	\$6.87	B	\$7.84	B
Operating profit	\$514	M	\$1.12	B
Operating margin	7.5	%	14.2	%
Average volume per day	12.3	M	12.9	M

Total package volume was 799 million pieces, down 3.6%, reflecting the weakness in the U.S. economy. Average daily volume declined 5.1%. While Next Day Air(R) volume increased 2.4%, ground decreased 6.2%. Revenue per piece declined 9.1% as a result of significantly lower fuel surcharges and lighter-weight packages.

As part of its focus on the environment, UPS became the first small package carrier to offer its customers the ability to offset the carbon emissions generated by the transport of their packages within the United States. The service is being well received and gives shippers the option of paying a small fee that UPS matches to purchase carbon offsets.

International Package	3Q 2009		3Q 2008	
Revenue	\$2.42	B	\$2.95	B
Operating profit	\$313	M	\$386	M
Operating margin	12.9	%	13.1	%
Average volume per day	1.97	M	1.90	M

International average daily volume rose 4%. Domestic volume increased 9.1% due to expansion of domestic services and an acquisition in Turkey. Export volume per day declined 3.2%, outperforming the market. Revenue per piece dropped 21%, reflecting the impacts of reduced fuel surcharges, currency and product mix.

During the quarter, the London Organising Committee of the Olympic Games named UPS the official logistics and express delivery supplier of the 2012 Games. UPS will oversee the

Games Logistics and Command Centre as well as manage all transportation and supply chain operations, including venue logistics and transportation, warehousing services, customs brokerage, freight forwarding and courier services.

Supply Chain and Freight	3Q 2009		3Q 2008	
Revenue	\$1.86	B	\$2.32	B
Operating profit	\$102	M	\$129	M
Operating margin	5.5	%	5.6	%

Although revenue and operating profit declined in the quarter, operating margin was flat with last year due to excellent revenue management and cost control.

Both the Logistics and Forwarding business units experienced moderation in the rate of revenue decline. The Logistics unit again achieved significant growth from its services to the healthcare industry.

UPS Freight performance was negatively impacted by increasingly competitive conditions in the freight environment. Nonetheless, the business outperformed the market and gained share while maintaining yields.

Outlook

"The business environment in the third quarter began similarly to that of the preceding quarter. However, we did see profitability improvement due to effective cost management and firming volume later in the quarter," said Kurt Kuehn, UPS's chief financial officer.

"We're confident in our ability to thrive by partnering with our customers and providing them the services they need to grow," he continued. "UPS is poised for the recovery when it comes. We've instituted cost initiatives that will approach \$1.4 billion this year, making UPS more efficient than ever. In addition, we will reduce our 2009 capital expenditures to \$1.7 billion, down \$500 million from our initial budget."

Although there are signs of economic recovery, forecasters predict U.S. consumers will spend conservatively for the holidays this year. "Our customers have widely differing views on their outlook for the holiday season. Nevertheless, UPS is primed to handle the seasonal package surge as it materializes," Kuehn added. "Continuing our earnings momentum from the third quarter, we expect earnings per diluted share within a range of \$0.58 to \$0.65 for the fourth quarter."

UPS is the world's largest package delivery company and a global leader in supply chain services, offering an extensive range of options for synchronizing the movement of goods, information and funds. Headquartered in Atlanta, Ga., UPS serves more than 200 countries and territories worldwide. UPS's stock trades on the New York Stock Exchange (UPS) and the company can be found on the Web at UPS.com. To get UPS news direct, visit pressroom.ups.com/RSS.

EDITOR'S NOTE: UPS Chairman and CEO Scott Davis and CFO Kurt Kuehn will discuss third quarter results with investors and analysts during a conference call today at 8:30 a.m. EDT. That conference call is open to listeners through a live Webcast. To access the call, go to www.investor.shareholder.com/UPS and click on "Earnings Webcast."

UPS routinely posts investor announcements on its web site, investor.shareholder.com/ups, and encourages those interested in the company to check there frequently.

In some periods, we supplement the reporting of our financial information determined under generally accepted accounting principles (GAAP) with certain non-GAAP financial measures, including, as applicable, "as adjusted" operating profit, operating margin, pre-tax income, net income and earnings per share. We believe that these adjusted measures provide meaningful information to assist investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring results of operations because they exclude items that may not be indicative of or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. Furthermore, we use these adjusted financial measures to determine awards for our management personnel under our incentive compensation plans. We also provide the amount of our free cash flow to supplement our cash flow determined under GAAP. We define free cash flow as net cash from operating activities adjusted for capital expenditures, proceeds from disposals of property, plant and equipment, net change in finance receivables and other investing activities. We believe free cash flow is an important measure in assessing the generation of cash for discretionary investments and dividends.

In the first quarter of 2009, we recorded a \$181 million pre-tax impairment charge (\$116 million after tax) related to our McDonnell-Douglas DC-8-71 and DC-8-73 aircraft fleets. In the second quarter of 2009, we recorded a \$77 million pre-tax charge (\$48 million after tax) for the remeasurement of certain obligations denominated in foreign currencies, in which hedge accounting was not able to be applied. We presented year-to-date 2009 operating profit, operating margin, pre-tax income, net income and earnings per share excluding the impact of these items as we believe these adjusted measures better enable shareowners to focus on period-over-period operating performance. The underlying matters that produced the impairment and remeasurement charges were unique, and we do not believe they are reflective of the types of charges that will affect future results.

Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. These adjusted financial measures should not be considered in isolation or as a substitute for GAAP operating profit, operating margin, pre-tax income, net income and earnings per share, the most directly comparable GAAP financial measures. These non-GAAP financial measures reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results and the reconciliations to corresponding GAAP financial measures, provide a more complete understanding of our business. We strongly encourage investors to review our financial statements and publicly-filed reports in their entirety and not to rely on any single financial measure.

Except for historical information contained herein, the statements made in this release constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking

statements, including statements regarding the intent, belief or current expectations of UPS and its management regarding the company's strategic directions, prospects and future results, involve certain risks and uncertainties. Certain factors may cause actual results to differ materially from those contained in the forward-looking statements, including economic and other conditions in the markets in which we operate, governmental regulations, our competitive environment, strikes, work stoppages and slowdowns, changes in aviation and motor fuel prices, cyclical and seasonal fluctuations in our operating results, and other risks discussed in the company's Form 10-K and other filings with the Securities and Exchange Commission, which discussions are incorporated herein by reference.
